Re: Compliance with the Consumer Product Safety Improvement Act of 2008

Dear Valued Customer:

*Cloud B, Inc.* is keenly aware of the compliance requirements of the Consumer Product Safety Improvement Act of 2008 (the "CPSIA") and to that end our own internal compliance requirements insure that we meet and/or exceed the stated requirements outlined in the Consumer Product Safety Improvement Act of 2008 for all of our products. All of our products are tested by certified testing agencies so that we do insure meeting the CPSIA standards.

As our products are specifically designed for children, we pay special attention to the new requirements relating to lead paint, lead content, phthalates and tracking labels for products designed or intended primarily for children twelve years old or younger ("Children's Products"). Further, any *Cloud B, Inc.* products in inventory as of February 10, 2009 regardless of date of manufacture meet the CPSIA standards.

*Cloud B, Inc.* will comply at all times with the CPSIA and all applicable laws. In particular, and without limitation, *Cloud B, Inc.* recognizes that it has a continuing obligation to provide products that are in compliance with the CPSIA and all applicable laws.

Please see our enclosed CPSIA certification information.

Thank you.

Sincerely,

***Nader Hamda***

Nader Hamda  
Chief Executive Officer  
Cloud B, Inc.
